I'm Catunderrain! 🐱💧

My Contributions

INTRODUCTION

Hi! My name is Toan, I'm from Viet Nam and I'm an AI learner.

With three years of in-depth research in machine learning, I aim to apply AI and machine learning to practical applications that assist humans, particularly in audio and image signal processing.

My goal is to promote the development of machines that can operate artistically and academically alongside humans.

I enjoy playing musical instruments, particularly the piano and guitar, and have a keen interest in music and art.

I am fascinated by observing natural phenomena and understanding their changes.

I love reading literature, poetry, and science books, and I am intrigued by the mathematical formulas that underlie life.

Additionally, I cherish my family and aspire to leverage technological advancements to enhance people's quality of life.

My nickname is: Cat Under Rain, but you can call me Hinzu

Contact me via [github](#) or email: catunderrain@gmail.com

It was a pleasure meeting you all and I hope we will progress together every day not only technically but also beyond ❤️

My favorite quote:

"Trí tuệ nhân tạo nghĩ gì khi tan biến?" (vi) - Shiro Akabane 6-21-20
